

MICRO DYNAMICS - MEGA30V

	Manufacturer: MICRO DYNAMICS
	Type: MEGA 30V

Description:

MICRO DYNAMICS MEGA 30V

Compact Power. Precision Performance.

The **MEGA 30V** is a high-performance **3-axis vertical machining center** designed for fast, stable and accurate machining in a compact footprint.

Built for productivity, the machine combines a rigid structure, high-speed spindle performance and excellent machining precision, making it a strong solution for **precision components, general machining, mould work and production environments** where reliability and efficiency matter.

Highlights

- Compact and efficient **vertical machining center**
- Designed for **high accuracy and stable cutting performance**
- Ideal for **precision parts and daily production work**
- Strong balance of **speed, rigidity and reliability**
- Built to support consistent machining quality in modern manufacturing

Built for dependable productivity.

The **MEGA 30V** delivers the performance expected from a modern machining center: precise movement, reliable spindle performance and a rigid machine platform — all in a practical and versatile package for a wide range of machining applications.
